**Subject:** Team Up with the City to Replace Sidewalks

[View this email in your browser](#)

**TEAM UP with the City to beautify our town &  
make it safer at the same time!**

As you stroll through town, we're sure you have noticed that many sidewalks were installed in 1912. That is over 100 years! Concrete seems to last a lifetime...however, it doesn't always stay in the best condition.

When salt, or even "concrete safe" products are used, it creates spalling (areas of concrete which have cracked & delaminated from the substrate) and other defects. Trees planted along the boulevards have heaved up the concrete creating huge trip hazards. Just over time, they lose quality.

**Well, did you know the City will help pay for  
Sidewalk Replacement?**

Do your sidewalks look like the above?

**The City is committed to the replacement of deteriorated and/or trip hazard sidewalks by tearing out and hauling away the debris as our contribution to your sidewalk replacement project. Concrete is heavy and this saves you the cost of labor to remove and the disposal fee at the landfill.**

**The City will also provide the American with  
Disabilities Act (ADA) corner tiles.  
This is approximately a \$400 expense, so  
ultimately a savings to you!**

***TIP - A SAFE SIDEWALK  
is the best defense in  
hazard prevention.***

*Inclement weather, such as rain and snow, increase the risk of trip, slip & fall. Shoveling is the best way to keep the sidewalks in great condition.*

---

**To arrange for the City's contribution, call 285-3408.**

(Please note you will still have to hire a contractor, or install it yourself, for the new sidewalk.)

**Check out the City of Three Forks' website for a list of licensed businesses. Search "concrete" for additional resources.**

---

**INFORMATION ON SIDEWALK CONSTRUCTION**  
**can be found in Public Design Standards, Section 5.5.5.**

- Sidewalk specifications,
- Construction requirements for sidewalks on Main Street,
- Construction of new sidewalks,
- Street obstruction during construction or repair,
- Width of sidewalks,
- And much more!

For questions on this program, please call the City of Three Forks at 406-285-3431.
